

FN-NANO s.r.o.

<https://fn-nano.com/>

Bilateral Meetings

- 10.15 - 12.30
- 13.15 - 15.40

Description

FN-NANO s.r.o. is a Czech innovation company focused on nanotechnology. The main products are high-performance photocatalytic coatings - FN® functional coatings with an extraordinarily strong photocatalytic effect. They are used to create surfaces that can clean themselves, prevent the build-up of microorganisms, and clean air from harmful substances.

FN-NANO s.r.o. je česká inovační firma zaměřena na uplatnění nanotechnologických výrobků využívajících fotokatalytický efekt v běžném životě. S jejich pomocí jsou vytvářeny povrchy, které se dokáží samy čistit, brání usazování mikroorganismů a čistí vzduch od škodlivých látek.

Organization Type

Company

Areas of Activities

Architectonic, design, construction engineering services

Construction materials

Floors, roofs and painting

Cultural heritage

Maintenance, renovation and modernisation

Building 4.0

Sustainable constructions and Green buildings

Offer

High-performance photocatalytic coatings for long-term facades protection, water and air cleaning.

We are looking for partners like painting and facade companies, construction companies, designers, architects, developers who are interested in a higher standard of healthy living and green buildings.
