Bilateral Meetings

- 10.15 - 12.30
- 13.15 - 15.40

Description

MoistureGuard humidity sensors allow you to track the humidity directly in the building structure of the object. They also detect hidden small leaks of water, preventing fatal consequences. This unique system is developed by experts of the University Centre of Energy Efficient Buildings of CTU as a precaution against prolonged exposure to increased humidity.

—
Senzory vlhkosti MoistureGuard vám umožňují sledovat vlhkost přímo v budově objektu. Zjišťují také skryté malé úniky vody a zabraňují smrtelným následkům. Tento jedinečný systém je vyvinut odborníky Univerzitního centra energeticky efektivních budov ČVUT jako preventivní opatření proti dlouhodobému vystavení zvýšené vlhkosti.
